2014-15 National School Safety Survey

METHODOLOGY

The School Safety Advocacy Council (SSAC) conducted this professional industry survey of school-based law enforcement officers, school administrators and school safety professionals through an online survey company (Survey Monkey), with the results being analyzed and reported through Survey Monkey.

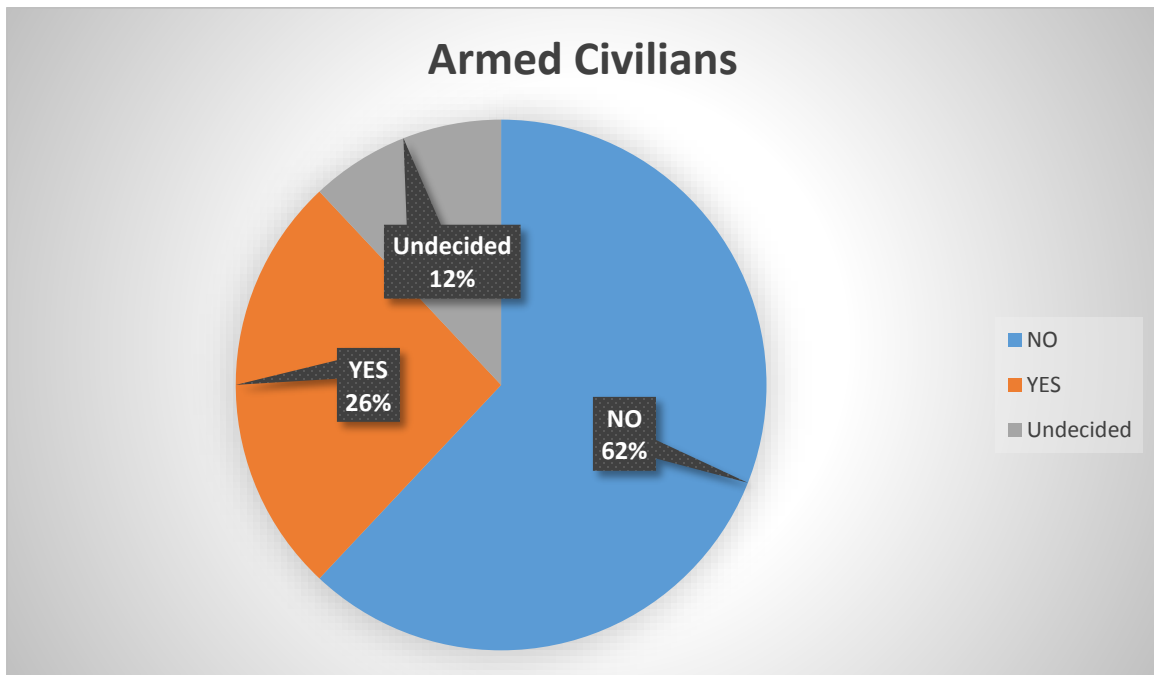

The short 6-question survey instrument was developed by staff at the School Safety Advocacy Council, in concert with leaders in the school safety field. The survey was distributed via e-mail, and no duplicate e-mail addresses or IP Addresses were allowed to complete the survey more than one time.

This is a professional industry survey. SSAC online surveys are intentionally not designed as, nor are they represented as, long-term scientific academic research studies. SSAC does believe the survey to be reliable and valid as a representative cross-section and subsection of those in the school safety profession.

Total number of Survey Responses: 623

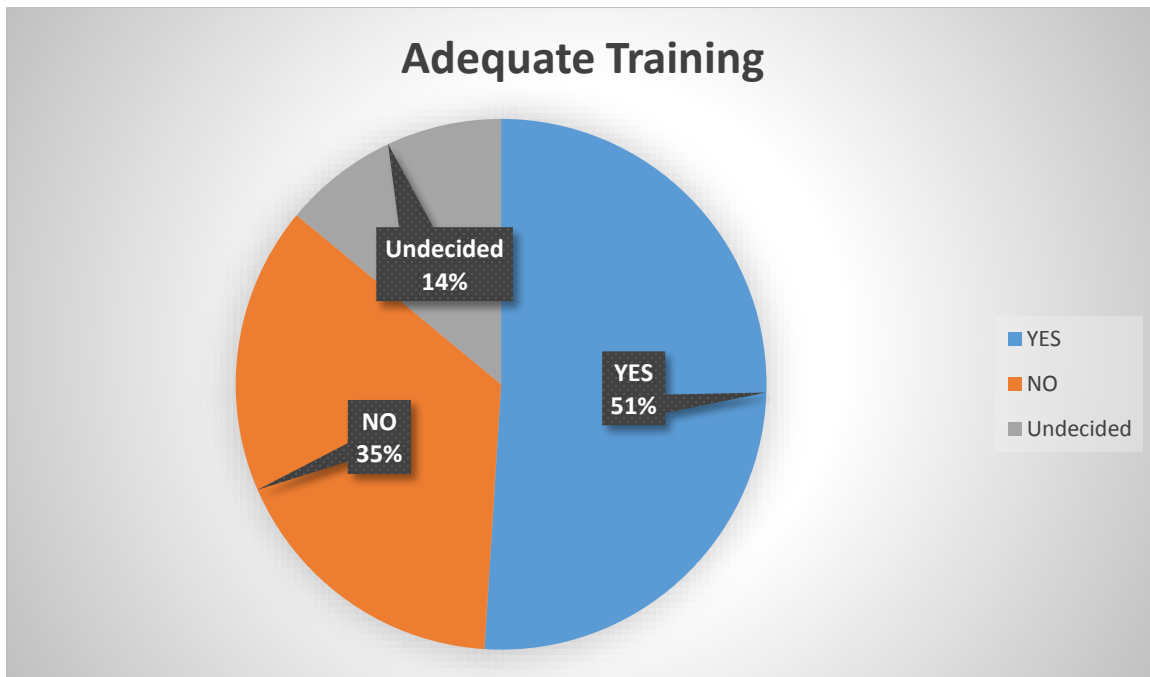

Question 1

Do you support non-law enforcement school staff (teachers, counselors, administrators) having the authority to carry firearms on school property as a means to protect students?

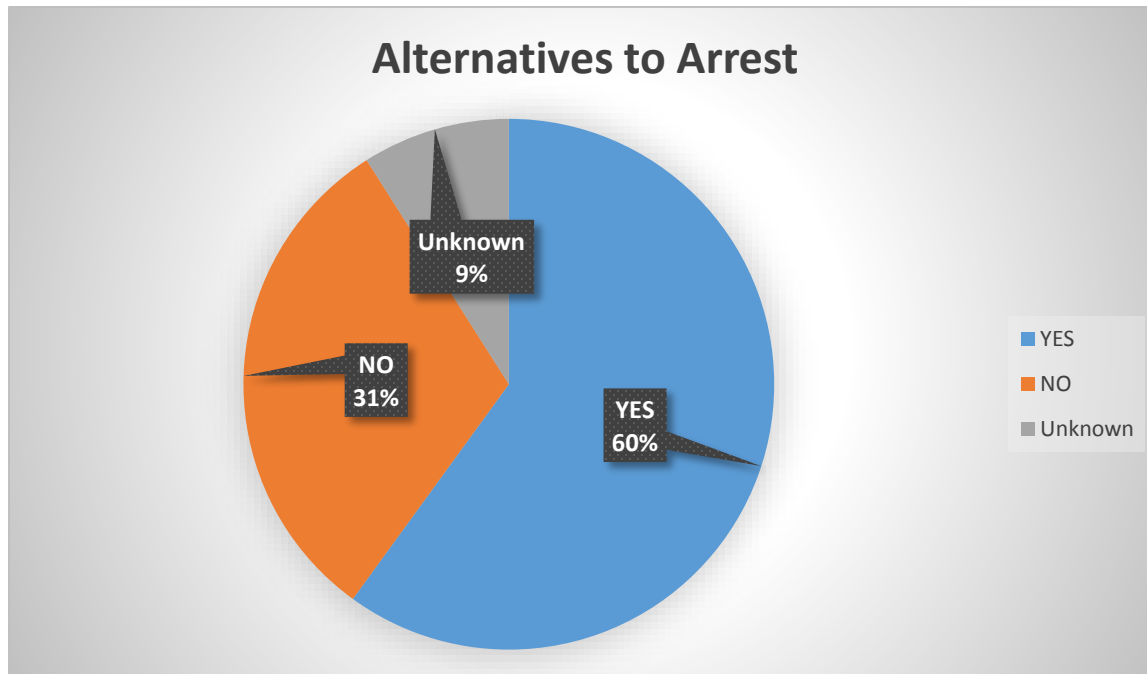

Question 2

Do you feel the level of training that you have been provided has adequately prepared you to deal with an active shooter at your school (s)?

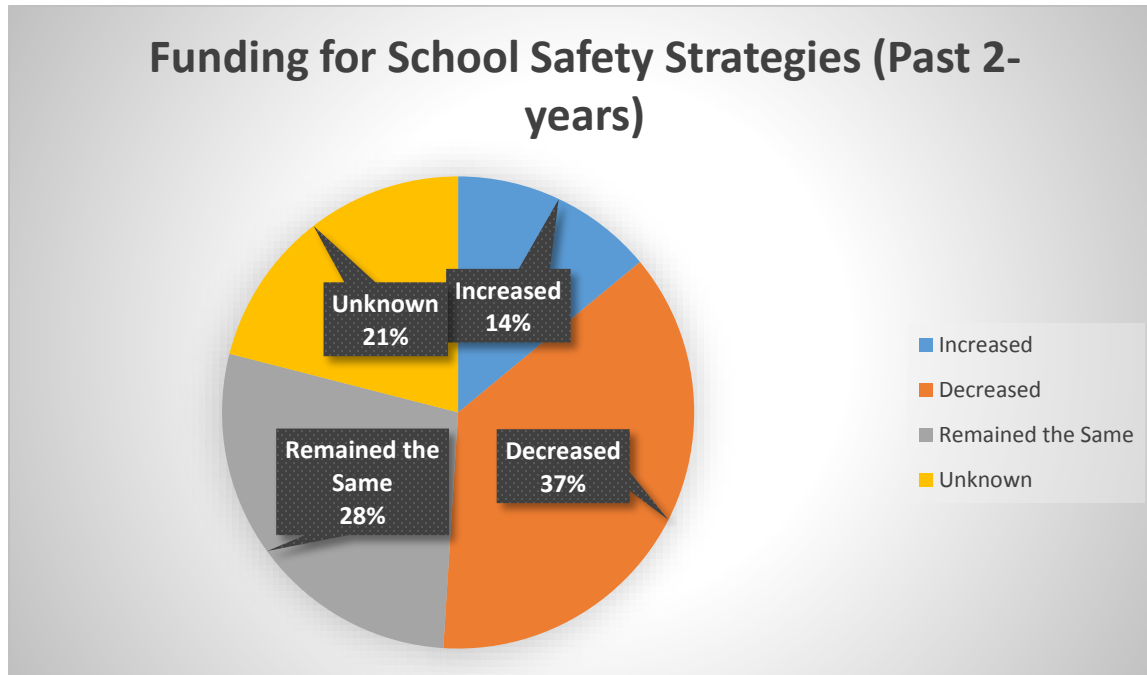

Question 3

Does your school and/or community have a program in place that addresses alternatives to criminal arrest (i.e. civil citation, teen court, restorative justice)?

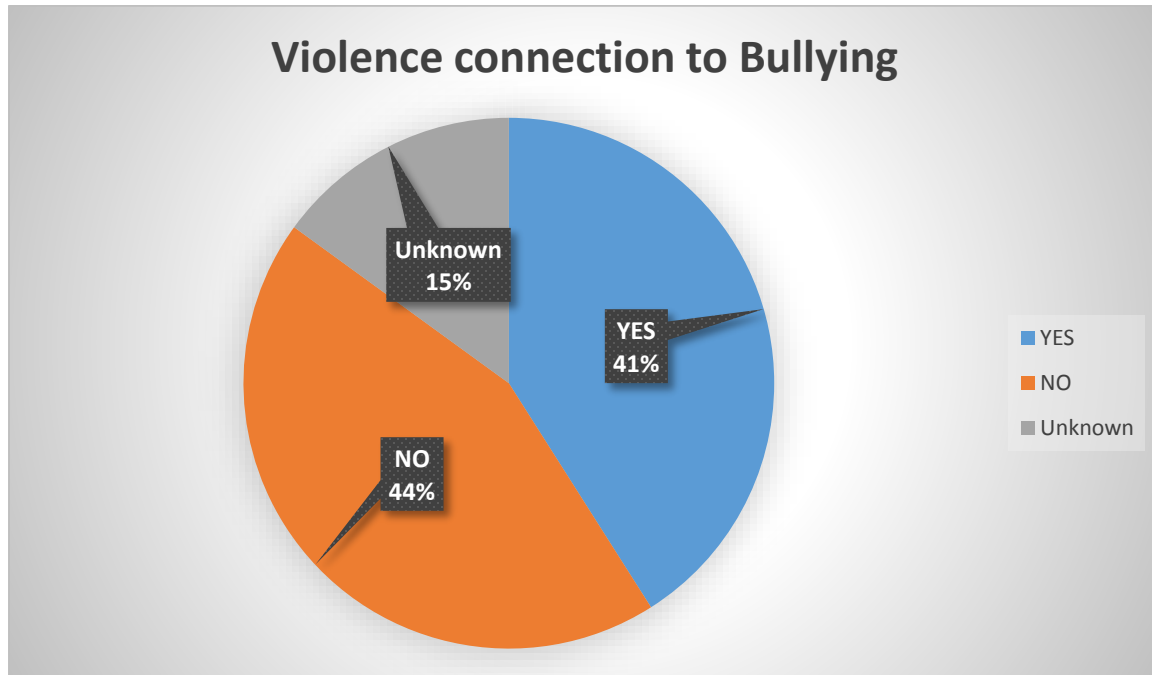

Question 4

In the past 2 years, has funding for School Safety Related strategies in your school or community, Increased, Decreased or Remained the Same?

Question 5

Do you feel that the majority of school violence issues in your school/community are related to Bullying?

Question 6

Has your school and/or district had an independent, outside school safety assessment?
